

Overview

This document is intended to provide a Collectorpro Appraiser Edition – Cloud user how to connect to the cloud instance from an iPad.

Confidentiality

This document is proprietary information of Collectorpro Software Inc. and the only allowed use is for Collectorpro clients to use with permission and on an as needed basis.

Background

If your Collectorpro Appraiser Edition is in the cloud you can connect from an iPad that is connected to the internet by using the Microsoft Remote Desktop Connection software for the iPad.

iPad Setup

- On the iPad go to the Apple App Store and search for “Microsoft Remote Desktop”. Install it and open.
- Tap the + in the upper right
- Tap Desktop on the Add New window
- Tap PC Name and enter the PC Name – (Contact us if you do not know the cloud name)
- Tap Done
- Tap Add User Account and enter User Name– (Contact us if you do not know the user name)
- Enter Password – (Contact us if you do not know the password)
- Tap Save
- Tap Save
- You will see a connection Icon, tap it to start the connection
- It prompted that the PC cannot be verified Tap Don’t ask me again for connection to this computer
- Tap Accept
- This should connect you and show the cloud computer desktop
